Company Overview

Sky Pixels Ltd is an innovative outdoor advertising and media technology company focused on delivering high-impact brand visibility solutions through modern outdoor advertising platforms.

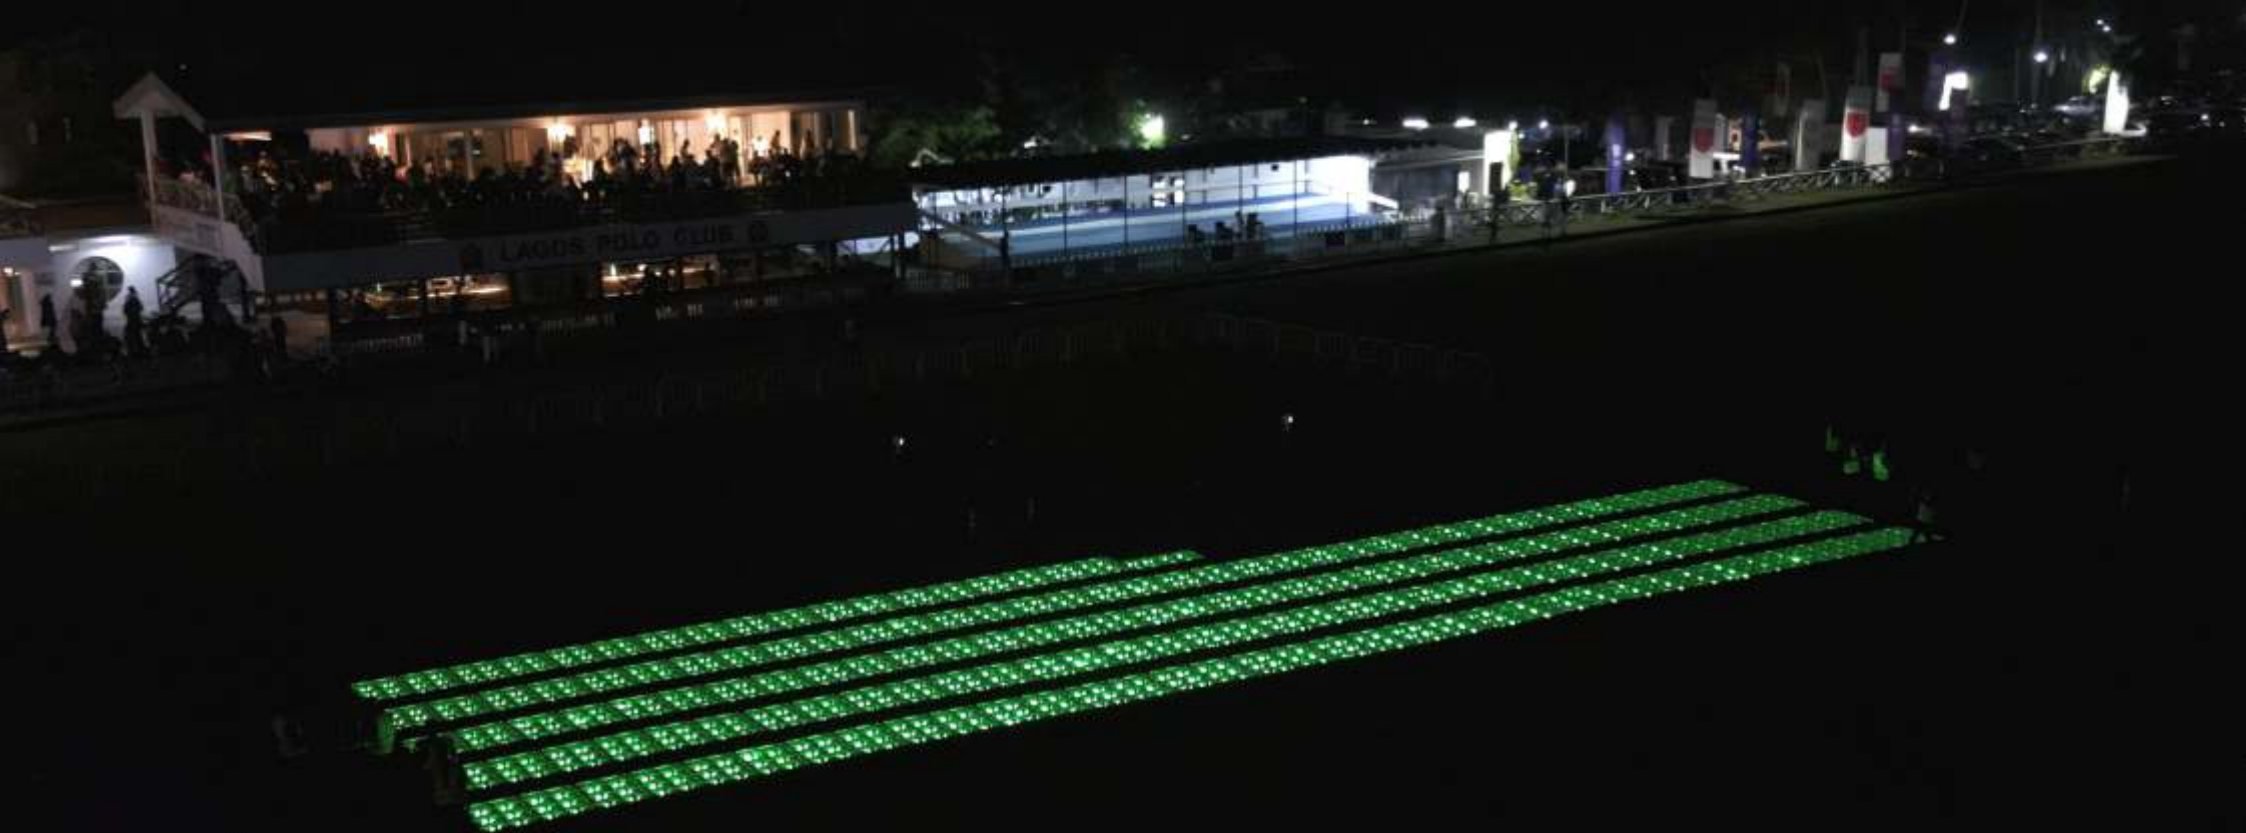

The company integrates traditional outdoor advertising infrastructure with advanced digital technologies and aerial display systems to provide creative advertising solutions for corporate organizations, government agencies, event promoters, and marketing agencies.

Sky Pixels Ltd specializes in the design, deployment, and management of outdoor advertising structures, digital display platforms, brand activation installations, and aerial drone advertising systems used for marketing campaigns, public events, and large-scale brand promotions.

The company is committed to delivering safe, compliant, and visually impactful advertising solutions that enhance brand communication while supporting the regulatory standards established by the State Signage and Advertisement Agency.

We turn the
Night Sky into
a Canvas

Vision

To become a leading provider of innovative outdoor advertising and aerial display solutions in Nigeria and across Africa.

Mission

To deliver creative, technology-driven outdoor advertising solutions that maximize brand visibility while maintaining the highest standards of safety, regulatory compliance, and environmental responsibility.

Objectives

The objectives of the Company include but are not limited to:

- To design, develop, install, operate, and manage outdoor advertising structures including billboards, digital displays, and signage installations.
- To provide innovative outdoor media solutions for advertising campaigns, public information messaging, and corporate brand communication.
- To deploy modern aerial advertising technologies including drone display systems for commercial promotions, events, and large-scale advertising campaigns.
- To provide integrated advertising services including brand activation, experiential marketing, and outdoor media planning.
- To install and operate LED digital billboards and other smart outdoor display technologies.
- To engage in the design, construction, leasing, and management of outdoor advertising infrastructure.
- To collaborate with government agencies, advertising agencies, and corporate organizations in the execution of advertising campaigns.
- To promote environmentally responsible advertising practices by introducing energy-efficient digital display technologies and innovative alternatives to traditional advertising formats.
- To engage in any lawful business activities related to outdoor advertising, media technology, and brand communication.

Your story
in the sky.
